

*Based on the Android phone, different Brand and Model may differ.

<h3>Turn on & connect</h3> <ol style="list-style-type: none">1. Swipe down from the top of the screen.2. Touch and hold Wi-Fi .3. Turn on Use Wi-Fi.4. Tap on "Add network".	 <p>The screenshot shows the Android Wi-Fi settings screen. At the top, the time is 11:21 and the battery is at 99%. The title is "Wi-Fi". Below the title, there is a toggle switch for "Wi-Fi" which is turned on. Underneath, there is a section for "Wi-Fi assistant" with a right arrow. A horizontal separator line follows. Below the separator, the text "AVAILABLE NETWORKS" is displayed. A list of networks is shown, each with a Wi-Fi icon, the network name, and frequency information: "NYP-Account 5G", "NYP-Apartments 2.4G/5G", "NYP-Spo...redUser 2.4G/5G", "NYP-Student 5G", "STAFF-2.4G", "POC-WIFI 2.4G/5G", and "POC-USER 2.4G/5G". Each network entry has a right arrow. At the bottom of the list, there is an "Add network" button, which is highlighted with a red rectangular box.</p>

After you connect, the network is "Saved." When your phone is near and Wi-Fi is on, your phone automatically connects to this network.

Troubleshooting Tips

Forget a network, so Android Phone doesn't join it automatically: Choose Wi-Fi and tap next to a network you've joined before. Then tap "Forget this Network."

Reset the network settings on iPhone: Choose Settings > General > Reset > Reset Network Settings.
